## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 31-33 and 40-44 are rejected under 35 U.S.C. 102(b) as being anticipated by Beck et al. (US Pat. No. 4,877,030.). Beck et al. discloses the following of the claimed invention: a catheter/elongate delivery member (5), a balloon (6), and a stent /elongate member (1), where the stent/elongate member and the balloon have contracted (Fig. 5) and deployed states (Fig. 6; col.2, lines 65-68). The balloon includes nylon fibers that serve as the anchoring element to reinforce the balloon (col. 2, lines 39-52). Since the balloon is made of rubber and the anchoring element consists of nylon fibers, they will be fully capable of forming straight and curved shapes, as dictated by the blood vessels.

### ***Response to Arguments***

Applicant's arguments with respect to claims 31 and 32 have been considered but are moot in view of the new ground(s) of rejection.
